

AMF Tromp and AMF Den Boer – formerly Tromp Group – provide best in class unit equipment and fully-integrated bakery solutions for the global baking industry. Together, AMF Bakery Systems, AMF Tromp, and AMF Den Boer help bakers grow their product portfolio with confidence to produce soft bread and buns, sheeted artisan breads, pizzas and flatbreads, cakes and pies, and pastries and croissants. Along with the latest bakery innovation, AMF provides expert design and applications engineering, production expertise, full-system integration, project management, installation, training and lifetime parts and service support.

## **Assembly Installation Engineer/Mechanic**

**Bunschoten**

As Assembly Installation Engineer you will work at AMF Den Boer facilities in Bunschoten. In cooperation with team members you will build complete automated production lines for the baking industry. You are responsible for mechanical and electrical parts assembly, and the complete testing process. You will be involved in big projects including installation and commissioning at customer factory.

### **What expertise are we looking for?**

You have (extensive) knowledge and experience to read blueprints and drawings. You have experience in using tools ( calliper, wrenches) and machines (drilling machines) and understand the principles of quality. Your personality is characterized by the following: problem-solving ability, hands-on, flexible and stress-resistant.

### **Most important Competencies required?**

You have an education level at MBO and proven experience as Assembler or mechanic. You are able to read, interpret and follow basic blueprints, diagrams, engineering drawings, specifications, bills of materials, and other written instructions or procedures to accurately assemble equipment and products. You align materials and collect parts to build complex units. You know how to handle quality work checks to insure the product meets our highest standards. You can identify product defects and take the necessary steps to change the appropriate documentation. You have experience in repairing assembled equipment according to engineering specifications.

### **Interested?**
